The Most Effective Exercises
Thursday, December 1, 11AM
Thursday, December 1, 7PM

This presentation is designed to introduce you to a series of exercises you have probably never seen, exercises specifically chosen to strengthen and balance your body's muscles based on the needs of people in our society today. You will learn exercises for your eyes, hands, upper back, neck, abdomen, and buttocks. You will learn the importance of doing exercises.
which properly balance your body's muscle system, not just strengthen what you think is important or what might look good to others. You will learn that your body has specific muscle balancing needs, and when these are not met, injury and illness are the outcome. If you truly want and need to be healthy, then this seminar is for you.

Presented by Dr. Ernest Caldwell, DC.

Self-compassion is not always easy to practice. In fact, we sometimes treat ourselves worse than we’d ever treat a friend. Fortunately, we can develop our ability to treat ourselves kindly. Join us for an interactive discussion where you’ll discuss what gets in the way of self-compassion and ways to foster your ability to be kind to yourself.
Presented by Master Life Coach Diane MacKinnon, M.D. Registration requested, walk-ins welcome.
