NLP: Simple Techniques to Improve your Life Right Now

Tuesday, February 11, 7PM

NLP, which stands for Neurolinguistic Programming, is a field of study that examines many different optimal processes, activities and methods of doing things. NLP examines each of these at a very minute level and extracts the essential elements so that they can be used by others hoping to do the same processes and activities at a very successful level. The essential elements

boil down to simple techniques that anyone can learn, many times in just a few minutes. These simple techniques can improve the quality of your life as soon as you learn them.

Join Diane MacKinnon, MD, Master Life Coach, for an interactive presentation. She'll teach you a number of these simple NLP techniques and send you home with resources, tips and strategies to continue to make positive changes at home. NLP techniques are fun, easy and incredibly powerful. Come see for yourself! Pre-registration is requested. [Register online](#) or call 886-6030.
